Showroom Guide

A quick reference to
door styles, material and finishes.

Design·Craft

Great design. Greater capacity.

EXPLORE
limitless possibilities.

Design-Craft gives you room to explore a constellation of possibilities. Bring tomorrow's trends to today's cabinetry with forward-thinking materials that push the boundaries of design technology. Envision a multitude of design options with door styles ranging from traditional raised panel styles to contemporary slab profiles. Create a space that showcases your personal style with finish choices including classic wood stains, cutting-edge acrylics, premium hardwood veneers, specialty finishes, and more. The only limit is your imagination.

Great design. Greater capacity.

ONE STYLE
Four Options

Design-Craft makes it easy to transcend the everyday with a wide selection of door options. Start by selecting a door frame; then choose your center panel—raised, beaded, flat or reverse raised. Raised panel suits classic styling, beaded for quaint and casual, and flat or reverse raised for streamlined and simplified.

Add interest to your design by using one panel style for the kitchen perimeter and accent with a different center panel for the island. With panel options available on a variety of Design-Craft doors, it's fun and easy to create looks for every personality and architectural style.

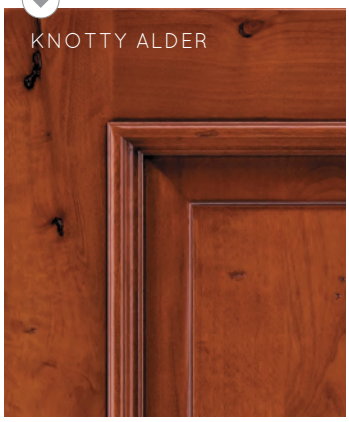
Wood Species & MDF

Paintable MDF is a great alternative to maple. Painted MDF gives a stylish, consistent look that is durable and more resistant to warping, expansion and contraction than solid hardwoods.

MDF
(Medium Density Fiberboard)

The rustic nature of this light brown wood showcases pin knots, open and closed knots, and mineral streaks that are embedded in uniform straight-grain patterns.



KNOTTY ALDER

The unique cutting of this oak creates close-knit vertical grain patterns that display a textured and figured appearance. Oak ranges in color from light tan to brown.

QUARTERSAWN OAK

MAPLE

The smooth texture and uniform grain patterns have a visible color range of creamy white to varying shades of brown, and turns amber with age.

CHERRY

The esteemed look of cherry ranges from light pink to varying shades of brown, and deepens in color with age.

OAK

Arching grain patterns are typical of the classic oak species. Natural wood colors range from light tans to dark reds and browns.

HICKORY

Bold, prominent grain patterns are characteristic of hickory. Additional features include: burls, pin knots, mineral streaks and small sound knots.

Wood Finishes

Let the natural beauty of your chosen wood shine through. Accentuate door details with Highlight Only or add dimension with a hand-applied Glaze and Highlight.

Give your cabinetry a smooth, uniform finish with classic paint shades, or add character with hand-brushed Highlight Only or Glaze and Highlight options.

These one-of-a-kind finishes are created by skilled artisans through multi-step processes including hand brushing, color-washing, and/or distressing.

Glaze Options

STAIN AND PAINT

HIGHLIGHT ONLY

Hand brushing glaze on doors, drawer fronts, molding and accessories to accent and define detail without changing the overall base color.

GLAZE AND HIGHLIGHT

Glaze is sprayed over all finished components then hand-wiped, changing the base color. Highlighting is added to define details on doors, drawer fronts, moldings and accessories.

available on oak, quartersawn oak, and straight-grain red oak

Finish Select

Take kitchens to a whole new level by creating a truly unique finish. Enhance the natural characteristics of wood with highlight or both glaze and highlight, or choose a specialty paint finish. Add richness with techniques such as dry brushing and distressing.

Once you have selected your door style, follow these simple steps to create a finish to complete your look. Remember to order and approve a sample door before placing your order.

1 CHOOSE YOUR BASE FINISH (Stain, Classic Paint, Custom Paint, Coastal Sheer)

2 CHOOSE YOUR GLAZE COLOR (Optional)

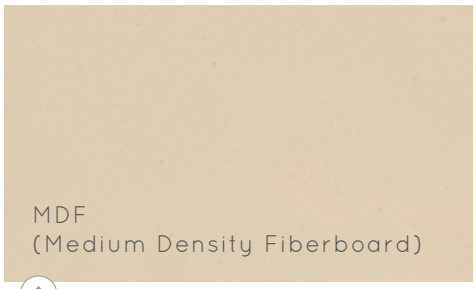
Premium Veneer & MDF

These premium hardwood veneer styles are available exclusively on the Bella door style to add eye-catching, trend-forward looks to your home. Or select a paintable MDF door for maximum durability with minimum maintenance.



Paintable MDF is a great alternative to maple. Painted MDF gives a stylish, consistent look that is durable and more resistant to warping, expansion and contraction than solid hardwoods. Refer to pages 10-11 for Classic Paint and Paint with Glaze and Highlight colors.

Layers of veneer are aesthetically combined to form uniform grain with high contrasting colors in Reconstituted veneers. Straight-grain Red Oak is a premium cut veneer displaying beautiful character and natural figuring of the wood.

These highly desirable veneers, like Bamboo or Sycamore, boast unique irregular patterns and contrast, offering a specialized look to your décor.

A solid, soft and muted finish available in two neutral tones.

Woodgrain finishes provide a realistic-looking, durable alternative to hardwoods.

Gloss is often used for contemporary or urban designs. These high luster finishes are available in a wide variety of colors.

Thermofoil offers realistic woodgrains, deep colors and protective gloss, satin or matte layers resulting in lustrous and durable finishes.

Craftsmanship

Design-Craft cabinets are created one at a time, one order at a time. Your cabinets are built to your exact specifications for style, organization and detailing. Inside every cabinet, you'll find exceptional craftsmanship and unique benefits.

QUALITY INSIDE AND OUT

▲ HEAVY-DUTY 3/4" thick materials

The ultimate in confidence with standard furniture board or upgraded plywood cases (sides, bottoms and floors) that are 33% thicker than most framed cabinets.

◀ MAPLE natural melamine interior

A beautiful, natural-looking maple melamine interior applied to standard furniture board or natural maple veneer interiors applied to upgraded plywood.

◀ WHITE melamine interior

A bright, fresh cabinet interior greets you every time with white melamine, applied to either standard furniture board or upgraded plywood.

PEACE AND QUIET. STANDARD.

Design-Craft has built-in benefits that may not be top-of-mind, but are definitely appreciated once installed.

▲ QUIET CLOSING doors

Special 110 degree opening door hinges also slow the occasional slam for a peaceful kitchen, day and night.

◀ QUIET CLOSE FULL EXTENSION drawer guides

A simple push will get these drawers going into the closed position, softly and quietly. Every Design-Craft drawer features full extension drawer guides that give you access to everything inside.

STANDARD

Design-Craft brings premium features to every product as standard.

▲ 3/4" THICK FURNITURE BOARD end panels

▲ 5/8" THICK SOLID-WOOD DOVETAIL drawers

UPGRADES

Upgrade options allow you to choose the look and level of performance you desire in your home.

▲ 3/4" THICK PLYWOOD end panels

▲ METAL DRAWERS

Easy-clean metal drawer sides make a bright, fresh complement to contemporary kitchens.

DRAWER CONSTRUCTION

Our drawer boxes maintain solid construction, giving you trustworthy durability and lasting strength. All our cabinets are proudly built here in the USA, strengthening local economies and ensuring high quality. Drawers feature:

- 5/8" thick hardwood sides
- 1/4" thick fully-captured drawer bottom
- Furniture-quality dovetail construction
- Sealed with clear coat for easy cleaning

NOTE: Wood character and color variations are visible in hardwood.

Fully captured drawer bottom

Dovetail construction

PLYWOOD

All Design-Craft plywood is sourced from domestic forests, including timber salvaged from wildfires and natural disasters. Because we are committed to environmental stewardship in our production processes, approximately 350,000 trees are planted for every one felled. We also ensure that our plywood meets or exceeds the highest standards for air quality (including TSCA Title VI and CARB emissions standards) and can contribute to LEED credits, as well.

For plywood upgrade cabinets, we use only the highest grade materials, including two types of plywood:

- Traditional plywood with an all-fir-crossband core has an ideal strength-to-weight ratio for many cabinet parts, so it is used for end panels, shelves, I-beams, hanging rails, etc.
- Engineered plywood with an MDF crossband core creates a superior surface for accepting stains and paints, so it is used for finished surfaces such as finished ends and matching finished interiors.
